

POPM Service Options and Pricing

POPM offers a versatile range of services designed to meet your unique project requirements, from bespoke advice and tailored support to service package solutions that can be further customised for targeted outcomes.

An hourly rate of \$200 (ex GST) applies to individualised services, confidential advice, on-demand expertise, and bespoke solution development. This flexible approach ensures you receive the precise level of support you need—scaling up or down as your project evolves or priorities shift.

Training is also available at this rate, empowering your team to build internal capacity for ongoing POPM assessments and monitoring, which can be brought in-house if preferred, or remain outsourced for independent oversight.

Below, you'll find our most popular service packages, offered at fixed-rate fees.
